

National Institutes of Health
National Heart, Lung, and Blood Institute

Symposium on Cardiovascular
Regenerative
Medicine

September 25-26, 2013

Natcher Conference Center
Bethesda, Maryland

The National Heart, Lung, and Blood Institute's fifth Symposium on Cardiovascular Regenerative Medicine will bring together experts in basic stem cell biology, as well as clinical cardiovascular medicine, to discuss the emerging basic science, preclinical animal models and potential clinical applications. Recent discoveries and trends will be emphasized. Challenges and critical scientific questions will be discussed with the goal of advancing the field and seeking opportunities for clinical translation.

- Session I: General Stem Cells
- Session II: Cardiovascular Stem Cells
- Session III: Tissue Engineering
- Session IV: NIH Support for Stem Cell Research
- Session V: Clinical Applications
- Session VI: Developmental Biology
- Session VII: Proteomics/Metabolomics
